Adaptation de domaine — distributions latentes source vs cible
Z_L = 32 — z_L[0]
Source (N=238)
Cible (N=3)
Densité
z_L[0]
Z_L = 32 — z_L[1]
Source (N=238)
Cible (N=3)
Densité
z_L[1]
Z_L = 44 — z_L[0]
Source (N=161080)
Cible (N=1620)
Densité
z_L[0]
Z_L = 44 — z_L[1]
Source (N=161080)
Cible (N=1620)
Densité
z_L[1]
